

The best home Wireless available!
Uncapped, unthrottled and you can shape
your own service for best performance.

Wireless Home

Jenny Internet is the first ISP in South Africa to give their clients the power to shape their own lines. Jenny Wireless Home is designed specifically for home use. We provide you with a control panel that enables you to improve your connection even if the whole family is using it at the same time. Jenny Priority Flow allows you to prioritize either gaming, video streaming for Netflix or many more configurations to streamline your connection based on your specific needs.

- Jenny Priority Flow options for Home Usage
- Low contention and latency
- Fantastic support via our call-centre, backed up by local technicians
- Online account management

Hello Netflix, Showmax and un-interrupted Gaming.
