## How our uncapped works

The Jenny uncapped wireless service will run at optimal speed until the Throttled After data threshold is reached. Once the Throttled After data threshold is reached, the speed will be reduced. You will receive an SMS, where you will be able to "boost" your Throttled After data threshold to a higher level. This way, you can ensure that your uncapped service never slows down. Throttled After data threshold boosters can be purchased on the usage page as well.

- Uncapped data is more contended than capped data.
- P2P data has low priority.
- By purchasing any Jenny Internet service, you agree to our Acceptable Use Policy.
