

Jenny Secure Backup can be used for all your backups.

Secure Backup

Loss of data due to crime or hardware failure on business premises is a costly expense for any business. Not only can data recovery amount to tens of thousands of rands, but also the loss of valuable time and information affecting day to day run of business. From first hand experience, Jenny Internet has developed a Secure Backup Service, which can safeguard your business information.

- Easy setup.
- Extremely secure and password protected.
- Data is stored in two different data centres.
- Complies with the POPI act.
