

Business Internet which is abuse proof.

A first in South Africa: Shape your business Internet to suit your needs using our control panel.

Wireless Business

Jenny Internet is the first ISP in South Africa to give their clients the power to shape their own lines. Wireless Business is designed specifically for business usage. We provide you with a control panel that enables you to improve your business connection even if everyone in the office is sitting on YouTube. Using the control panel you can configure your line to give you a seamless high speed connection that is uninterrupted by video streaming.

- Jenny Priority Flow (control panel to shape your own line)
- Low contention and latency
- Fantastic support via our call-centre, backed up by local technicians
- Online account management
