

Broadband Wireless

Reliable business Internet. Simplified.

Jenny Broadband Wireless gives your business fast, dependable connectivity with proactive monitoring built in. We detect faults early and log the ticket ourselves. And because there are no trenches to dig, most sites are online in days, not months.

Why choose Jenny Broadband Wireless?

- Uncapped and unthrottled
- Speeds from 10Mbps to 500Mbps
- Automatic downtime detection
- Installed in days, not months
- Low contention
- Local dealers and local technicians

Built for business

Designed for stable, consistent performance without waiting for fibre to reach your street. A wireless link cannot be cut by cable theft or severed by an excavator. Ideal for cloud applications, voice, video and other critical business operations.

What's included

- External antenna on the roof, indoor Wi-Fi access point, all labour, cabling and sundries
- Static IP addresses available. Contact our sales team for pricing

Support you can rely on

Jenny Internet offers reliable 7-day support, including public holidays, so help is always available when needed. Whether through our call centre or chat assistant, you can count on fast, effective assistance to minimise downtime and keep your business connected.
