

Layer 2 to Teraco

Direct, secure connectivity to Teraco data centres.

Jenny Layer 2 to Teraco gives your business a secure, direct connection to Teraco data centres in Johannesburg, Durban or Cape Town, bypassing the public Internet. Delivered across our wireless network and handed over on a VLAN.

Why choose Jenny Layer 2 to Teraco?

- Direct connection to Teraco, bypassing the public Internet
- Layer 2 handoff on a VLAN
- Symmetrical upload and download speeds
- Virtual cross-connect at Teraco, physical available for special cases
- Client-side equipment installed in 1 to 7 working days
- Our network is already dual fibre-fed into Teraco
- Support, Advanced Support and Technical teams, 7 days a week

Built for business

For infrastructure teams running colocation, hybrid cloud, private peering or disaster recovery. If you already pay for rack space or a cloud on-ramp at Teraco, reaching it over the open Internet undermines much of what you bought.

What's included

- Layer 2 connection handed over on a VLAN
- 1 static public routable IP address
- 150 email addresses
- Additional IPs and email accounts on request

Support you can rely on

7-day support through our call centre, with dedicated Support, Advanced Support and Technical teams. Backed by local expertise in your own country.
