

Commercial Complex Fibre

Fibre infrastructure for modern developments.

Jenny Commercial Complex Fibre delivers high-performance connectivity to business parks, malls and mixed-use centres. Fast deployment without disruptive trenching, and one accountable partner for both the network and the Internet service.

Why choose Jenny Commercial Complex Fibre?

- Rapid deployment with no trenching
- Business-grade speed and reliability
- One provider for infrastructure and Internet service
- 7-day expert tenant support
- Each business billed and supported individually
- Symmetrical options available where upload matters
- Secure network under our control end to end

Built for business

Connectivity is now a letting decision, like parking or air conditioning. For tenants it is the difference between trading on Monday and waiting a quarter for a line. The infrastructure is installed once for the complex, and each business simply connects to it.

What's included

- Fibre connectivity to every unit
- Individual service, billing and support per business
- Network and Internet service managed by one provider
- Standard service is asymmetrical, with upload at 50% of download
- Symmetrical service available at 50% above the standard price

Support you can rely on

7-day support, including public holidays, through our call centre, chat assistant and website. Tenants and businesses deal with one provider, not two.
