

# Mega Hotspot

Affordable Internet for your building. Income for you.

Jenny Mega Hotspot is a shared wireless service for apartment blocks, complexes and student housing. Tenants buy vouchers for fast, affordable Internet with no line installation and no contract. You earn a share of every voucher sold.

## Why choose Jenny Mega Hotspot?

- A genuine income stream from a building you already own or manage
- Fed by Jenny wireless or fibre, so the speed impresses people
- No line installation, hardware or contract for tenants
- Once-off or monthly voucher options
- Appoint one or two resellers and it largely runs itself
- Monthly sales report, then you invoice us for your profit
- Improves the appeal and marketability of your property

## Built for property owners

For apartment buildings, complexes, student accommodation and hotels. Anywhere a large number of people sit within range of one well-placed connection, and where individual fixed lines to every unit would be impractical or unaffordable.

## What's included

- Wireless Internet access throughout the serviced building
- Access for tenants on any Wi-Fi-enabled device
- Once-off or monthly voucher options
- Automated sales and billing
- Monthly sales report and revenue share
- Installation and maintenance by an authorised Jenny provider

## Support you can rely on

7-day telephonic and email support for property owners and tenants. Installation and maintenance are handled by an authorised Jenny service provider.
