

Mini Hotspot

Easy guest Wi-Fi for your business.

Jenny Mini Hotspot lets you offer controlled Wi-Fi to customers using voucher codes you create yourself. You set how long each voucher lasts, how much data it carries and how fast it runs. Your own network stays private.

Why choose Jenny Mini Hotspot?

- Create your own vouchers with time, data and speed limits
- Offer free vouchers, paid vouchers, or both
- Guests connect to your own landing page, not your private network
- Easy to manage through our online admin software
- Generate additional income from voucher sales
- Attract customers with Wi-Fi they can actually use
- Ideal for cafés, shops and customer-facing businesses

Built for small venues

Guesthouses, cafés, waiting rooms, salons and small offices all face the same question: how do you give people Internet access without giving them your password and your whole connection. A voucher answers it. Access is deliberate, limited and easy to withdraw.

What's included

- Managed Wi-Fi hotspot service
- Online voucher creation and admin software
- Free and paid voucher options with time and data limits
- Custom guest landing page
- Hotspot traffic kept separate from your private network
- Requires an active Jenny connection and an additional Jenny router

Support you can rely on

7-day support, including public holidays, through our call centre, chat assistant and website. Backed by local technicians in your own country.
